

Poland: Lublin and Skarzysko - two drone plants, two fires, one likely hostile entity

A masked man over a fence, an incendiary charge, and a foreign-intelligence file. The second fire, thirty hours earlier in Lublin, has no established cause.

INCIDENT DETAILS • 5WH

Who Targets - WB Group at Skarzysko-Kamienna, maker of the Warmate; JFG Composites at Lublin. One masked individual on camera. No arrests, no claim, no state named.

What Two fires in about thirty hours. Skarzysko - drone components set alight, at least 15m zloty. Lublin - a hall destroyed, about 21m zloty.

Where Skarzysko-Kamienna, Swietokrzyskie, and Lublin, about 200 km apart.

When Lublin, afternoon of Sunday 30 August 2026. Skarzysko, shortly after midnight on 30 to 31 August. Investigations made public 31 August to 1 September.

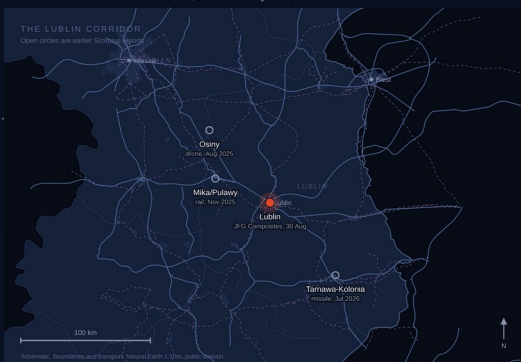

Why Both sit in the drone and aviation supply chain for Polish and Ukrainian forces. No official motive stated.

How Skarzysko - perimeter scaled, incendiary charge, intruder disturbed by a worker, backpack and sweatshirt recovered. Lublin - arson, technical fault and spontaneous ignition all still open.

IMPACT

- At least 15m zloty at Skarzysko and about 21m zloty at Lublin. No casualties at either.
- Drone components for Polish and Ukrainian forces destroyed. The Lublin loss reaches a helicopter programme as well.
- One person with a charge crossed the fence of a major defence firm. The barrier that failed was a fence, not a firewall.
- Two fires reported-together read as one campaign whether or not one exists, and that impression is free to a hostile actor.

SEQUENCE OF EVENTS

- Nov 2022** Przewodow: a stray missile, two dead
- Nov 2025** Rail sabotage on the Lublin line
- 30 Aug - a hall burns in Lublin
 - After midnight - a man crosses the fence
 - An incendiary charge is set; he is disturbed
 - Skarzysko opened as foreign-intelligence work
 - Lublin opened under a different article

ASSESSMENT, LESSONS, AND RECOMMENDATIONS

- The articles are the tell. Skarzysko runs as assistance to a foreign intelligence service; Lublin under the general article for danger by fire.
- It is almost certain the Skarzysko fire was set deliberately, and almost certain it was directed and enabled by a hostile state; highly likely that state is Russia.
- Lublin carries no band, because nothing is established. Three hypotheses are open and the building could not be entered.
- The corridor is the finding. It is highly likely Lublin province features again, and a realistic possibility other sites are being reconnoitred now.
